

Helping Folks “Catch the Buzz”

S.T.E.A.M Honeybee Song

I spend a lot of time explaining to students that bees on flowers are not interested in us humans... they are simply shopping for pollen and nectar to feed their family.

Here is my own original little song especially for young children, sung to the familiar tune of the The Alphabet Song:

A-Bee-C-D-F-Gee

Hey, I see a honeybee!

BUZZ-BUZZ-BUZZ

She won't sting me.

**She's just shopping for
her family!**

**Next, have the students write the second
verse themselves!**
